

DM Batch 1

B.E / B.Tech. PRACTICAL END SEMESTER EXAMINATIONS

Sixth Semester

CCW332 – DIGITAL MARKETING LABORATORY

(Regulations 2021) - SET 1

Time: 3 Hours | Max. Marks: 100

MARK ALLOCATION TABLE

Aim	Procedure	Output/Diagram	Viva-Voce	Record	Total
10	40	30	10	10	100

1. Newsletter Analysis for Branding & Segmentation

Aim: To subscribe to a newsletter and analyze its branding and customer segmentation.

Procedure:

1. Subscribe to a popular business newsletter (e.g., HubSpot).
2. Analyze the header (logo placement, brand colors) for branding.
3. Analyze the body content for value and structure.
4. Identify the target audience (segmentation) based on the tone and offers.

Diagram to Draw: Draw a wireframe of a Newsletter:

- [Header Box]: Company Logo & Date.
- [Image Box]: Hero Image.
- [Text Box]: Main Content & Article snippet.
- [Button]: "Read More" (Call to Action).
- [Footer]: Social media icons & Unsubscribe link.

Output: A summary report detailing the brand identity and target audience.

Result: Newsletter successfully analyzed.

2. Keyword Search using Google Keyword Planner

Aim: To perform a keyword search for a hospital website using Google Keyword Planner.

Procedure:

1. Log in to **Google Ads** and navigate to Tools & Settings -> **Keyword Planner**.
2. Click "Discover new keywords" and type "ask in care hospital".
3. Filter the location and language settings.
4. Note down the Search Volume and Competition metrics.

Diagram to Draw (Tabulation):

Draw a table representing the Google Keyword Planner results:

Keyword	Avg. Monthly Searches	Competition
ask in care hospital	1K - 10K	Low
best care hospital near me	10K - 100K	High
24/7 care hospital	100 - 1K	Medium

Output: A list of high-volume, low-competition keywords.

Result: Keyword research performed successfully.

3. Demonstrate Google WebMasters Indexing API

Aim: To demonstrate the use of the Google WebMasters Indexing API for rapid crawling.

Procedure:

1. Go to Google Cloud Console and enable the "Web Search Indexing API".
2. Create a Service Account and download the JSON key.
3. Add the service account email to Google Search Console as an 'Owner'.
4. Send a **POST** request to the API with the URL you want Google to index.

Diagram to Draw (Flowchart):

```
[Webmaster] --> [Create JSON Key in Cloud] --> [Authenticate in Search Console] --> [Send POST Request with URL] --> [Google Search Index]
```

Output: An HTTP "200 OK" response indicating the URL was submitted.

Result: Google WebMasters Indexing API demonstrated successfully.

4. Case Study: Insurance Company Lead Management

Aim: To analyze how an insurance company captures and manages leads.

Procedure:

1. **Lead Generation:** Collect customer details via online forms and social media ads.

2. **Lead Scoring:** Assign scores based on user interaction (e.g., clicking email links).
3. **Lead Nurturing:** Send automated, educational emails explaining insurance plans.
4. **Conversion:** Sales team calls high-scoring leads to close the policy.

Diagram to Draw (Sales Funnel):

Draw a large inverted triangle (Funnel) divided into 3 sections:

5. Top: **Awareness** (Ads, Website traffic).
6. Middle: **Consideration** (Emails, Lead Nurturing).
7. Bottom: **Decision** (Sales Call, Buying Policy).

Output: A structured case study on the CRM-based lead lifecycle.

Result: Lead management process discussed successfully.

5. Social Media for Political Advertising

Aim: To discuss the positive/negative impacts and ethics of social media political ads.

Procedure:

1. **Positive Impacts:** High reach, cost-effective, allows direct communication with youth.
2. **Negative Impacts:** Spread of fake news, echo chambers, and extreme polarization.
3. **Ethical Implications:** Discuss data privacy breaches (e.g., Cambridge Analytica) and micro-targeting voters without consent.

Diagram to Draw (Mind Map):

Draw a center circle labeled "Political Social Media Ads". Draw 3 branches connecting to:

4. "Positives" -> (Reach, Cost).
5. "Negatives" -> (Fake News, Polarization).
6. "Ethics" -> (Data Privacy, Manipulation).

Output: A comprehensive discussion report.

Result: Impacts and ethical implications analyzed successfully.

6. Create the Digital Marketing Webpage

Aim: To create a landing webpage for a digital marketing campaign.

Procedure:

1. Open a CMS platform (like WordPress or Wix) or write HTML.
2. Create a Hero Section with a catchy Headline.
3. Add a Lead Capture Form asking for Name and Email.
4. Insert a prominent Call-to-Action (CTA) button (e.g., "Sign Up Now") and publish.

Diagram to Draw (Webpage Layout):

Draw a rectangle representing a screen:

- Top Bar: Logo (Left) / Navigation Links (Right)
 - Center Left: Big Headline Text & smaller subtext.
 - Center Right: A square box titled "Sign Up Form" with Name/Email fields and a "Submit" button.
- Output:** A functional, visually appealing lead-capture landing page.
- Result:** Digital Marketing webpage created successfully.
-

7. Conducting SEO and SEM

Aim: To implement Search Engine Optimization (SEO) and Search Engine Marketing (SEM).

Procedure:

1. **SEO (Organic):** Optimize title tags, meta descriptions, and use H1/H2 headers on the website.
2. **SEM (Paid):** Create a Google Ads account.
3. Set up a Pay-Per-Click (PPC) Search Campaign.
4. Write ad copy, bid on keywords, and allocate a daily budget.

Diagram to Draw (SERP Layout):

Draw a Search Engine Results Page (Google):

- Top result: [Ad] Buy Shoes Online - Free Shipping (Label this "SEM / Paid").
- Second result: [Ad] Top Branded Shoes (Label this "SEM / Paid").
- Third result: Best Running Shoes of 2024 (Label this "SEO / Organic Result").

Output: An SEO-optimized webpage and a live paid search campaign.

Result: SEO and SEM techniques applied successfully.

8. Predictive Analytics in Marketing Automation

Aim: To discuss how predictive analytics impacts marketing automation.

Procedure:

1. Collect historical customer data (past purchases, browsing history).
2. Apply Machine Learning algorithms to predict future buying behaviors.
3. Use these predictions in automation tools to trigger hyper-personalized emails.
4. Recommend specific products before the customer even searches for them.

Diagram to Draw (Flowchart):

```
[Historical Customer Data] --> [Machine Learning / Predictive Model] --> [Marketing Automation Tool] --> [Trigger Personalized Email Campaign]
```

Output: A report highlighting increased ROI and reduced customer churn.

Result: The impact of predictive analytics discussed successfully.

9. Creating Promotional Banner through Canva

Aim: To design a digital promotional banner using Canva.

Procedure:

1. Go to Canva.com and click "Create a design" -> "Banner".
2. Choose a template or start from scratch with brand colors.
3. Add a company logo, bold promotional text (e.g., "50% OFF"), and product images.
4. Click Share -> Download as a PNG or JPG file.

Diagram to Draw (Banner Sketch):

Draw a wide rectangular banner:

- Top Left: "Flash Sale!"
- Middle Left: "50% OFF ON ALL ITEMS" in large bold letters.
- Bottom Left: A box for the "Shop Now" button.
- Right Side: Draw a sketch of a product (e.g., a laptop or shoe).

Output: A high-quality digital promotional banner graphic.

Result: Promotional banner created successfully using Canva.

10. Facebook Promotion using Banners

Aim: To run a promotional campaign on Facebook using designed banners.

Procedure:

1. Open **Facebook Ads Manager**.
2. Click "Create" and select a campaign objective (e.g., Traffic).
3. Set the Daily Budget and define the Target Audience (Age, Location, Interests).
4. Upload the Canva banner, write primary text, add a destination URL, and click Publish.

Diagram to Draw (Hierarchy Chart):

Draw the structure of a Facebook Ad Account:

```
[Campaign (Sets the Objective: e.g., Traffic)]
```

```
|--> [Ad Set (Sets Audience, Location, and Budget)]
```

```
|--> [Ad (The actual Image/Banner and Text)]
```

Output: A live Facebook Ad campaign generating impressions and clicks.

Result: Facebook promotion launched successfully.
